#As per graph:-

#Cluster 1 :The Hold median is the highest in this cluster , which also contains separate Hold,
 Moderate Buy, Moderate Sell, and Strong Buy medians. They are listed on the NYSE and come from
 the US, UK, and Switzerland.

#Cluster 2: Although the firms are evenly divided throughout AMEX, NASDAQ, and NYSE,  has a dist
inct Hold and Moderate Buy median, as well as a different count between the US and Germany.

#Cluster 3: listed on the NYSE, has separate counts for France, Ireland, and the US, and has equ
al moderate buy and sell medians.

#Cluster 4: dispersed throughout the US and UK, as well as being listed in, has the identical ho
ld and moderate buy medians

#Cluster 5: #solely listed on the NYSE, equally dispersed in the US and Canada, with Hold and Mo
derate Buy medians.

#With respect to media Recommendation Variable ,the clusters follow a particular pattern:
#Cluster 1 and Cluster 2 has Hold Recommendation.
#Cluster 3, Cluster 4and Cluster 5 has moderate buy Recommendation.
```

```
# (d)Provide an appropriate name for each cluster using any or all of the variables in the datas
et.

#Cluster 1 :-  HIGH HOLD CLUSTER
#Cluster 2 :- HOLD CLUSTER
#Cluster 3 :- BUY-SELL CLUSTER
#Cluster 4 :- HOLD-BUY CLUSTER
#Cluster 5 :- HOLD-BUY CLUSTER
```
